

TEACHING APTITUDE ASSESSMENT

Comprehensive Standardized Educator Competency Examination (130 Points)

Candidate Name:

Date:

Institution/Center:

Score: / 130

General Instructions & Assessment Structure:

- **Test 1: Multiple Choice Questions (Items 1–30)** — 1 point each. Select the single best answer.[cite: 1]
- **Test 2: True or False Questions (Items 1–80)** — 1 point each. Mark [T] for True or [F] for False.[cite: 5]
- **Test 3: True or False Supplemental (Items 1–20)** — 1 point each. Mark [T] for True or [F] for False.[cite: 8, 9]

TEST 1: MULTIPLE CHOICE QUESTIONS (ITEMS 1–30)

1. According to Bloom's Revised Taxonomy, which of the following represents the highest order of cognitive thinking?[cite: 1]

- A) Analyzing[cite: 1] B) Applying[cite: 1]
C) Creating[cite: 1] D) Evaluating[cite: 1]

2. Which learning theory asserts that knowledge is actively constructed by the learner based on prior experiences, rather than passively absorbed?[cite: 1]

- A) Behaviorism[cite: 1] B) Constructivism[cite: 1]
C) Cognitivism[cite: 1] D) Humanism[cite: 1]

3. A teacher uses informal quizzes, exit tickets, and targeted questioning during a unit to monitor student progress. This is an example of:[cite: 1]

- A) Diagnostic assessment[cite: 1] B) Summative assessment[cite: 1]
C) Formative assessment[cite: 1] D) Evaluative assessment[cite: 1]

4. According to Lev Vygotsky, the "Zone of Proximal Development" (ZPD) refers to:[cite: 1]

- A) What a learner can do independently without assistance.[cite: 1] B) What a learner can achieve only with guided support and scaffolding.[cite: 1]
C) The developmental stage where abstract operational thought begins.[cite: 1] D) The social environment surrounding the school setting.[cite: 1]

5. A student continually interrupts class to gain attention. Under behavioral management principles, the most effective initial teacher response is to:[cite: 1]

- A) Immediately send the student to the principal's office.[cite: 1] B) Praise off-task behaviors when they shift focus.[cite: 1]
C) Extinguish the behavior by withholding attention while reinforcing positive behavior.[cite: 1] D) Reprimand the student loudly in front of the entire class.[cite: 1]

6. Differentiated instruction requires a teacher to adjust which three primary elements based on student readiness, interest, or learning profile?[cite: 1]

- A) Content, Process, Product[cite: 1] B) Curriculum, Grading, Testing[cite: 1]
C) Attendance, Behavior, Effort[cite: 1] D) Objectives, Standards, Outcomes[cite: 1]

7. What is the main characteristic of an authentic assessment?[cite: 2]

- | | |
|---|---|
| A) It relies solely on standardized multiple-choice questions.[cite: 2] | B) It measures student performance through real-world, meaningful tasks.[cite: 2] |
| C) It yields high reliability across national testing populations.[cite: 2] | D) It measures performance exclusively through formal closed-book exams.[cite: 2] |

8. When a teacher aligns objectives, learning activities, and assessments together, this process is known as:[cite: 2]

- | | |
|--|---|
| A) Backward Design / Constructive Alignment[cite: 2] | B) Spiral Curriculum Development[cite: 2] |
| C) Standardized Curriculum Mapping[cite: 2] | D) Deductive Planning[cite: 2] |

9. Which style of classroom management is characterized by high expectations combined with high support and open communication?[cite: 2]

- | | |
|---------------------------|------------------------|
| A) Authoritarian[cite: 2] | B) Permissive[cite: 2] |
| C) Authoritative[cite: 2] | D) Uninvolved[cite: 2] |

10. Jean Piaget identified four stages of cognitive development. In which stage does a child develop abstract and hypothetical reasoning?[cite: 2]

- | | |
|----------------------------------|--------------------------------|
| A) Sensorimotor[cite: 2] | B) Preoperational[cite: 2] |
| C) Concrete Operational[cite: 2] | D) Formal Operational[cite: 2] |

11. What is the primary purpose of a rubric in student assessment?[cite: 2]

- | | |
|--|---|
| A) To shorten the time it takes to grade exams.[cite: 2] | B) To provide clear criteria and performance standards for both teacher and learner.[cite: 2] |
| C) To rank students from highest to lowest achievement.[cite: 2] | D) To replace formal summative assessments entirely. [cite: 2] |

12. A teacher notices that a student frequently puts their head down and refuses to participate in group tasks. What should the teacher do first?[cite: 2]

- | | |
|---|---|
| A) Issue a detention slip immediately.[cite: 2] | B) Speak with the student privately to understand underlying issues.[cite: 2] |
| C) Ignore the student and focus entirely on compliant peers.[cite: 2] | D) Deduct points from the student's final report card. [cite: 2] |

13. What is the primary focus of Pavlov's Classical Conditioning theory in an educational context?[cite: 2]

- | | |
|--|---|
| A) Associating neutral stimuli with unconditioned responses to build emotional comfort.[cite: 2] | B) Using schedules of reinforcement to increase academic output.[cite: 2] |
| C) Modeling behavior through observational social interactions.[cite: 2] | D) Developing logical-mathematical problem-solving strategies.[cite: 2] |

14. Which statement best reflects the concept of an inclusive classroom?[cite: 2]

- | | |
|--|--|
| A) Separating students with special needs into specialized isolated units at all times.[cite: 2] | B) Adapting learning environments so all students, regardless of ability, learn together.[cite: 2] |
| C) Keeping teaching techniques identical for every student in class.[cite: 2] | D) Lowering academic standards so everyone receives passing grades.[cite: 2] |

15. Howard Gardner's Theory of Multiple Intelligences suggests that intelligence is:[cite: 3]

- | | |
|---|---|
| A) A single, general factor (g-factor) measurable by IQ tests.[cite: 3] | B) Composed of at least eight distinct types of modalities.[cite: 3] |
| C) Fixed at birth and incapable of significant development.[cite: 3] | D) Purely determined by linguistic and mathematical mastery.[cite: 3] |

16. What is the chief advantage of open-ended questions during instruction?[cite: 3]

- A) They allow quick automated grading.[cite: 3]
- B) They stimulate higher-order thinking and diverse perspectives.[cite: 3]
- C) They limit student responses to factual accuracy.[cite: 3]
- D) They eliminate classroom discussion time.[cite: 3]

17. A test is considered valid if it:[cite: 3]

- A) Yields consistent results across multiple testing sessions.[cite: 3]
- B) Accurately measures what it claims or intends to measure.[cite: 3]
- C) Is easy to administer and score.[cite: 3]
- D) Displays a perfect normal distribution curve.[cite: 3]

18. What is the primary objective of scaffolding instruction?[cite: 3]

- A) To complete the student's work on their behalf.[cite: 3]
- B) To provide temporary support structures that are gradually removed.[cite: 3]
- C) To keep students quiet while working independently.[cite: 3]
- D) To slow down the overall pace of the curriculum.[cite: 3]

19. Which of the following is an intrinsic motivator for a student?[cite: 3]

- A) Receiving a gold star sticker.[cite: 3]
- B) Avoiding parental punishment.[cite: 3]
- C) A personal desire to master a complex topic out of curiosity.[cite: 3]
- D) Earning a monetary reward for good marks.[cite: 3]

20. What is the central tenant of the "Spiral Curriculum" proposed by Jerome Bruner?[cite: 3]

- A) Topics should be taught once thoroughly and never revisited.[cite: 3]
- B) Key concepts should be introduced simply and revisited at increasing complexity.[cite: 3]
- C) Students should only learn content matching their exact biological age.[cite: 3]
- D) Assessment must precede instruction in every learning cycle.[cite: 3]

21. What is the main goal of classroom rules and procedures?[cite: 3]

- A) To restrict student freedom and encourage blind compliance.[cite: 3]
- B) To create a safe, orderly environment that maximizes learning time.[cite: 3]
- C) To lessen the administrative burden on school leadership.[cite: 3]
- D) To penalize non-conformity among diverse learners.[cite: 3]

22. A norm-referenced test compares a student's performance to:[cite: 3]

- A) A predefined standard or learning objective.[cite: 3]
- B) The performance of a national or peer normative sample group.[cite: 3]
- C) The student's own previous baseline score.[cite: 3]
- D) The teacher's personal expectations.[cite: 3]

23. Which term refers to a teacher's belief in their capability to execute actions necessary to bring about desired student outcomes?[cite: 4]

- A) Pedagogical isolation[cite: 4]
- B) Teacher self-efficacy[cite: 4]
- C) Curriculum fidelity[cite: 4]
- D) Locus of external control[cite: 4]

24. Universal Design for Learning (UDL) focuses on providing multiple means of:[cite: 4]

- A) Engagement, Representation, and Action/Expression[cite: 4]
- B) Punishment, Reward, and Isolation[cite: 4]
- C) Homework, Lectures, and Exams[cite: 4]
- D) Reading, Writing, and Arithmetic[cite: 4]

25. What is the best strategy for managing transition times between classroom activities?[cite: 4]

- A) Allowing students to take unstructured free breaks. [cite: 4]
- B) Establishing clear routines and explicit cues for transitions.[cite: 4]
- C) Threatening to deduct points if transitions take longer than 30 seconds.[cite: 4]
- D) Stopping the lesson abruptly without prior warning. [cite: 4]

26. Which type of research is conducted by teachers within their own classrooms to solve immediate practical problems?[cite: 4]

- A) Basic Research[cite: 4]
- B) Applied Laboratory Research[cite: 4]
- C) Action Research[cite: 4]
- D) Historical Research[cite: 4]

27. Metacognition is best defined as:[cite: 4]

- A) The memory capacity required for short-term recall. [cite: 4]
- B) Awareness and understanding of one's own thinking processes.[cite: 4]
- C) Emotional intelligence used to navigate peer conflicts.[cite: 4]
- D) The speed at which an individual processes sensory input.[cite: 4]

28. In B.F. Skinner's Operant Conditioning, removing an unpleasant stimulus to increase the likelihood of a desirable behavior is called:[cite: 4]

- A) Positive Reinforcement[cite: 4]
- B) Negative Reinforcement[cite: 4]
- C) Positive Punishment[cite: 4]
- D) Extinction[cite: 4]

29. What is the main purpose of diagnostic assessment?[cite: 4]

- A) To assign final grades at the end of a semester.[cite: 4]
- B) To evaluate school performance for accreditation. [cite: 4]
- C) To identify baseline knowledge, strengths, and gaps prior to instruction.[cite: 4]
- D) To compare student performance against international standards.[cite: 4]

30. Which pedagogical approach prioritizes hands-on, inquiry-based, and student-centered exploration over passive listening?[cite: 4]

- A) Direct Instruction[cite: 4]
- B) Active Learning[cite: 4]
- C) Expository Teaching[cite: 4]
- D) Rote Memorization[cite: 4]

TEST 2: TRUE OR FALSE QUESTIONS (ITEMS 1–80)

#	Statement	Response
1	According to Behaviorist theory, learning is defined primarily as an observable change in behavior caused by external stimuli.[cite: 5]	[T] [F]
2	Jean Piaget stated that assimilation occurs when new information modifies existing cognitive schemas.[cite: 5]	[T] [F]
3	Abraham Maslow's Hierarchy of Needs implies that basic physiological and safety needs must be met before a student can fully focus on self-actualization.[cite: 5]	[T] [F]
4	Albert Bandura's Social Learning Theory emphasizes that children can learn new behaviors purely through observation and modeling.[cite: 5]	[T] [F]
5	Extrinsic motivation always yields longer-lasting academic retention than intrinsic motivation.[cite: 5]	[T] [F]
6	Operant conditioning relies heavily on mental representations, inner thoughts, and conscious reflections.[cite: 5]	[T] [F]
7	Benjamin Bloom developed a taxonomy that categorizes educational goals into Cognitive, Affective, and Psychomotor domains.[cite: 5]	[T] [F]
8	Constructivist classrooms prioritize lecture-based delivery over collaborative problem-solving.[cite: 5]	[T] [F]
9	Executive functioning skills involve self-regulation, working memory, and cognitive flexibility.[cite: 5]	[T] [F]
10	Transfer of learning occurs when prior learning influences performance in a new context or task.[cite: 5]	[T] [F]
11	Neuroplasticity proves that a student's cognitive capabilities are fixed permanently at birth.[cite: 5]	[T] [F]
12	Growth mindset, as conceptualized by Carol Dweck, is the belief that intelligence can be developed through effort and strategy.[cite: 5]	[T] [F]
13	Howard Gardner's theory dictates that schools should only focus on linguistic and logical-mathematical intelligences.[cite: 5]	[T] [F]
14	Schema theory posits that memory is stored in interconnected networks of prior knowledge.[cite: 5]	[T] [F]
15	In Classical Conditioning, a conditioned response occurs naturally without prior training or pairing.[cite: 5]	[T] [F]
16	Scaffolding should remain permanently in place throughout a student's academic life.[cite: 5]	[T] [F]
17	Self-regulated learners monitor their own comprehension and adapt strategies when they hit obstacles.[cite: 5]	[T] [F]
18	Immediate feedback generally enhances the acquisition of newly learned skills.[cite: 5]	[T] [F]
19	Overlearning a skill decreases retention and causes cognitive fatigue over time.[cite: 5]	[T] [F]

#	Statement	Response
20	Information Processing Theory compares the human mind's handling of information to the operations of a computer system.[cite: 5]	[T] [F]
21	Direct Instruction is a highly structured, teacher-led instructional strategy.[cite: 5]	[T] [F]
22	Inquiry-based learning starts by presenting students with facts to memorize before asking questions.[cite: 6]	[T] [F]
23	Cooperative learning requires group members to work together toward a shared learning objective.[cite: 6]	[T] [F]
24	Flipped classrooms shift direct instruction outside the group learning space to make room for interactive work in class.[cite: 6]	[T] [F]
25	Project-Based Learning (PBL) focuses exclusively on short-term memorization of individual textbook chapters.[cite: 6]	[T] [F]
26	Wait-time should ideally be limited to less than one second to keep the lesson moving fast.[cite: 6]	[T] [F]
27	Differentiated instruction requires creating 30 completely individual lesson plans for a class of 30 students.[cite: 6]	[T] [F]
28	Asking higher-order questions encourages students to analyze, evaluate, and synthesize information.[cite: 6]	[T] [F]
29	Experiential learning asserts that learning is most effective when derived from reflective direct experience.[cite: 6]	[T] [F]
30	Problem-Based Learning starts with an authentic, ill-structured problem for students to investigate.[cite: 6]	[T] [F]
31	Inductive teaching moves from general rules and theories down to specific examples.[cite: 6]	[T] [F]
32	Gamification involves introducing game elements into non-game learning environments.[cite: 6]	[T] [F]
33	Universal Design for Learning (UDL) principles are applied solely to students identified with physical disabilities.[cite: 6]	[T] [F]
34	Reciprocal teaching is an instructional activity in which students become the teacher in small group reading sessions.[cite: 6]	[T] [F]
35	Socratic questioning relies on guided dialogue to challenge underlying assumptions and foster critical thinking.[cite: 6]	[T] [F]
36	Lecturing without visual aids or interactive checks is the most effective method for long-term retention across all age groups.[cite: 6]	[T] [F]
37	Culturally Responsive Teaching connects students' cultural backgrounds, languages, and experiences to the curriculum.[cite: 6]	[T] [F]
38	Multimodal instruction appeals to multiple senses (auditory, visual, kinesthetic) simultaneously or sequentially.[cite: 6]	[T] [F]
39	Discovery learning requires no teacher guidance, structure, or intervention whatsoever.[cite: 6]	[T] [F]

#	Statement	Response
40	Formative checks for understanding should occur continuously throughout a lesson rather than just at the end.[cite: 6]	[T] [F]
41	Effective classroom management focuses more on preventing misbehavior through clear procedures than on reacting to disruptions.[cite: 6]	[T] [F]
42	Authoritarian teachers encourage open dialogue and negotiate classroom rules with students.[cite: 6]	[T] [F]
43	Proximity control involves a teacher moving closer to a disruptive student to quell off-task behavior discreetly.[cite: 7]	[T] [F]
44	Classroom rules are most effective when stated in clear, positive terms (e.g., "Walk quietly" instead of "Don't run").[cite: 7]	[T] [F]
45	Teachers should handle every behavioral infraction with maximum severe disciplinary measures to establish authority.[cite: 7]	[T] [F]
46	Establishing consistent daily routines reduces cognitive load and behavioral disruptions.[cite: 7]	[T] [F]
47	The "Ripple Effect" occurs when a teacher's correction of one student's misbehavior influences surrounding students.[cite: 7]	[T] [F]
48	Social-Emotional Learning (SEL) programs hinder academic development by taking time away from core subjects.[cite: 7]	[T] [F]
49	De-escalation strategies require a teacher to remain calm, lower their voice, and avoid aggressive physical postures.[cite: 7]	[T] [F]
50	Publicly shaming misbehaving students builds trust and long-term behavioral compliance.[cite: 7]	[T] [F]
51	Non-verbal cues, such as eye contact and hand signals, can redirect student behavior without interrupting instruction.[cite: 7]	[T] [F]
52	A Token Economy system relies on secondary reinforcers that can be exchanged for tangible rewards or privileges.[cite: 7]	[T] [F]
53	Classroom seating arrangements have negligible impact on student interaction patterns and focus.[cite: 7]	[T] [F]
54	Restorative justice practices in schools focus on repairing harm and rebuilding relationships rather than punitive exclusion.[cite: 7]	[T] [F]
55	Consistency in enforcing expectations is a key factor in successful classroom management.[cite: 7]	[T] [F]
56	Overlappingness refers to a teacher's ability to attend to two or more classroom events simultaneously.[cite: 7]	[T] [F]
57	Kounin's concept of "Withitness" refers to a teacher's awareness of what is happening in all parts of the classroom at all times.[cite: 7]	[T] [F]
58	Praise is equally effective regardless of whether it is general ("good job") or specific ("great job using evidence").[cite: 7]	[T] [F]
59	Clear transitions between activities reduce lost instructional time.[cite: 7]	[T] [F]

#	Statement	Response
60	Burnout in teaching can be mitigated through effective time management, peer support, and personal boundaries.[cite: 7]	[T] [F]
61	A test can be reliable without being valid.[cite: 7]	[T] [F]
62	Diagnostic assessment is administered primarily at the completion of a course or program.[cite: 7]	[T] [F]
63	Criterion-referenced assessments measure student performance against fixed performance standards or learning outcomes.[cite: 7]	[T] [F]
64	Formative assessments are mainly used to assign final term grades.[cite: 7]	[T] [F]
65	Construct validity refers to whether a test adequately covers the entire domain of a given subject matter.[cite: 8]	[T] [F]
66	Assessment for learning focuses on using assessment data to adjust instruction and guide student growth.[cite: 8]	[T] [F]
67	Portfolio assessment offers a longitudinal, authentic collection of student work over time.[cite: 8]	[T] [F]
68	Objectivity in grading is increased through the use of clear, pre-established scoring rubrics.[cite: 8]	[T] [F]
69	High-stakes testing has no documented negative effects on student anxiety or curriculum narrowing.[cite: 8]	[T] [F]
70	Standard deviation indicates how spread out test scores are from the mean score.[cite: 8]	[T] [F]
71	Grade inflation happens when high marks are awarded for work that does not reflect high achievement.[cite: 8]	[T] [F]
72	A teacher has the ethical obligation to maintain student confidentiality regarding academic and personal records.[cite: 8]	[T] [F]
73	Standardized tests measure student potential without any cultural or socioeconomic bias.[cite: 8]	[T] [F]
74	Feedback is most effective when it focuses on the student's personal traits rather than performance effort.[cite: 8]	[T] [F]
75	Educators must adhere to professional codes of ethics regarding relationships with students, parents, and colleagues.[cite: 8]	[T] [F]
76	Item analysis helps teachers evaluate the difficulty and discrimination power of individual test questions.[cite: 8]	[T] [F]
77	Teachers may legally reproduce copyrighted print materials in unlimited quantities for commercial gain without permission.[cite: 8]	[T] [F]
78	Inclusive education requires reasonable accommodations to ensure equal access to learning opportunities for all.[cite: 8]	[T] [F]
79	Analytic rubrics evaluate an assignment as a whole without breaking it down into individual skill components.[cite: 8]	[T] [F]

#	Statement	Response
80	A negatively skewed distribution indicates that most students scored low on an examination.[cite: 8]	[T] [F]

TEST 3: TRUE OR FALSE QUESTIONS (ITEMS 1–20)

#	Statement	Response
1	Summative evaluations provide continuous, day-to-day feedback to students during the learning cycle.[cite: 8]	[T] [F]
2	Peer assessment encourages student reflection, metacognition, and critical evaluation of academic work.[cite: 8]	[T] [F]
3	Teachers are mandated reporters required by law to report suspected child abuse or neglect.[cite: 8]	[T] [F]
4	Test reliability can be increased by clarifying question wording and standardizing testing conditions.[cite: 8]	[T] [F]
5	A diagnostic reading inventory pinpoints specific phonetic or comprehension deficits in struggling readers.[cite: 8]	[T] [F]
6	Self-assessment diminishes student autonomy and accountability in the learning process.[cite: 8]	[T] [F]
7	Professional Development for teachers should be an ongoing, lifelong reflective practice.[cite: 8]	[T] [F]
8	Bias in testing occurs when test items systematically disadvantage one group of students over another based on background.[cite: 8]	[T] [F]
9	A bell curve (normal distribution) assumes that the majority of student scores cluster around the average score.[cite: 9]	[T] [F]
10	Educational equity means providing every single student with identical resources regardless of individual need.[cite: 9]	[T] [F]
11	Constructive alignment ensures learning activities directly support intended learning outcomes.	[T] [F]
12	Formative assessment results should always be weighted equally with final examinations in term averages.	[T] [F]
13	Anonymizing student answer sheets prior to grading helps mitigate teacher grading bias.	[T] [F]
14	High self-efficacy among teachers is strongly correlated with higher academic achievement in students.	[T] [F]
15	Curriculum alignment only concerns the relationship between textbooks and state examinations.	[T] [F]
16	Divergent thinking questions typically have exactly one correct factual response.	[T] [F]
17	Construct irrelevance occurs when an assessment measures variables unrelated to the intended target attribute.	[T] [F]
18	Peer review exercises in assessment reduce student reflective thinking and critical engagement.	[T] [F]
19	Rubric transparency prior to assignment submission improves student learning outcomes and self-regulation.	[T] [F]

#	Statement	Response
20	Washback effect refers to the impact that testing and assessment practices have on teaching and classroom learning.	[T] [F]

ANSWER KEYS & ASSESSMENT REFERENCE

Test 1 Key: Multiple Choice (Items 1–30)

1. C[cite: 10]	2. B[cite: 10]	3. C[cite: 10]	4. B[cite: 10]	5. C[cite: 10]	6. A[cite: 10]	7. B[cite: 10]	8. A[cite: 10]	9. C[cite: 10]	10. D[cite: 10]
11. B[cite: 10]	12. B[cite: 10]	13. A[cite: 10]	14. B[cite: 10]	15. B[cite: 10]	16. B[cite: 10]	17. B[cite: 10]	18. B[cite: 10]	19. C[cite: 10]	20. B[cite: 10]
21. B[cite: 10]	22. B[cite: 10]	23. B[cite: 10]	24. A[cite: 10]	25. B[cite: 10]	26. C[cite: 10]	27. B[cite: 10]	28. B[cite: 10]	29. C[cite: 10]	30. B[cite: 10]

Test 2 Key: True or False (Items 1–80)

1. T[cite: 10]	2. F[cite: 10]	3. T[cite: 10]	4. T[cite: 10]	5. F[cite: 10]	6. F[cite: 10]	7. T[cite: 10]	8. F[cite: 10]	9. T[cite: 10]	10. T[cite: 10]
11. F[cite: 10]	12. T[cite: 10]	13. F[cite: 10]	14. T[cite: 10]	15. F[cite: 10]	16. F[cite: 10]	17. T[cite: 10]	18. T[cite: 10]	19. F[cite: 10]	20. T[cite: 10]
21. T[cite: 10]	22. F[cite: 10]	23. T[cite: 10]	24. T[cite: 10]	25. F[cite: 10]	26. F[cite: 10]	27. F[cite: 10]	28. T[cite: 10]	29. T[cite: 10]	30. T[cite: 10]
31. T[cite: 10]	32. F[cite: 10]	33. F[cite: 10]	34. T[cite: 10]	35. T[cite: 10]	36. F[cite: 10]	37. T[cite: 10]	38. T[cite: 10]	39. F[cite: 10]	40. T[cite: 10]
41. T[cite: 10]	42. F[cite: 10]	43. T[cite: 10]	44. T[cite: 10]	45. F[cite: 10]	46. T[cite: 10]	47. T[cite: 10]	48. F[cite: 10]	49. T[cite: 10]	50. F[cite: 10]
51. T[cite: 10]	52. T[cite: 10]	53. F[cite: 10]	54. T[cite: 10]	55. T[cite: 10]	56. T[cite: 10]	57. T[cite: 10]	58. F[cite: 10]	59. T[cite: 10]	60. T[cite: 10]
61. T[cite: 10]	62. F[cite: 10]	63. T[cite: 10]	64. F[cite: 10]	65. F[cite: 10]	66. T[cite: 10]	67. T[cite: 10]	68. T[cite: 10]	69. F[cite: 10]	70. T[cite: 10]
71. T[cite: 10]	72. T[cite: 10]	73. F[cite: 10]	74. F[cite: 10]	75. T[cite: 10]	76. T[cite: 10]	77. F[cite: 10]	78. T[cite: 10]	79. F[cite: 10]	80. F[cite: 10]

Test 3 Key: True or False Supplemental (Items 1–20)

1. F[cite: 10]	2. T[cite: 10]	3. T[cite: 10]	4. T[cite: 10]	5. T[cite: 10]	6. F[cite: 10]	7. T[cite: 10]	8. T[cite: 10]	9. T[cite: 10]	10. F[cite: 10]
11. T	12. F	13. T	14. T	15. F	16. F	17. T	18. F	19. T	20. T

Score Rubric & Performance Benchmarks (Out of 130 Points):

- **117–130 points (90–100%):** Superior Teaching Aptitude — Exceptional mastery of pedagogical principles and assessment practices.[cite: 10]
- **104–116 points (80–89%):** High Aptitude — Strong grasp of foundational educational concepts.[cite: 10]
- **91–103 points (70–79%):** Average/Competent — Adequate knowledge base; targeted review recommended. [cite: 10]
- **Below 91 points (<70%):** Needs Preparation — Focused study on core pedagogy and classroom management recommended.[cite: 10]

Comprehensive Teaching Aptitude Assessment

Consolidated Test Item Structure & Thematic Clusters

TEST 1: Multiple Choice Questions (Items 1–30)
